GATE PREVIOUS YEAR SOLVED PAPERS

Mechanical Engineering Previous Year Solved Papers

GATEFORUM Pioneers in Digital courses for GATE since 2008 has long history of training students through innovative courses. Currently GATEFORUM offers a wide range of courses from eGATE, GATE Online, Gdrive to Online TarGATE. Since inception, we have trained more 3,00,000 students since inception.

The pie chart for exports shows the quantity of each item exported as a percentage of the total quantity of

exports. The pie chart for the revenues shows the percentage of the total revenue generated through export of each item. The total quantity of exports of all the items is 500 thousand tonnes and the total revenues are 250 crore rupees. Which item among the following has generated the maximum revenue per kg?

10. It takes 30 minutes to empty a half-full tank by draining it at a constant rate. It is decided to simultaneously pump water into the half-full tank while draining it. What is the rate at which water has to be pumped in so that it gets fully filled in 10 minutes?

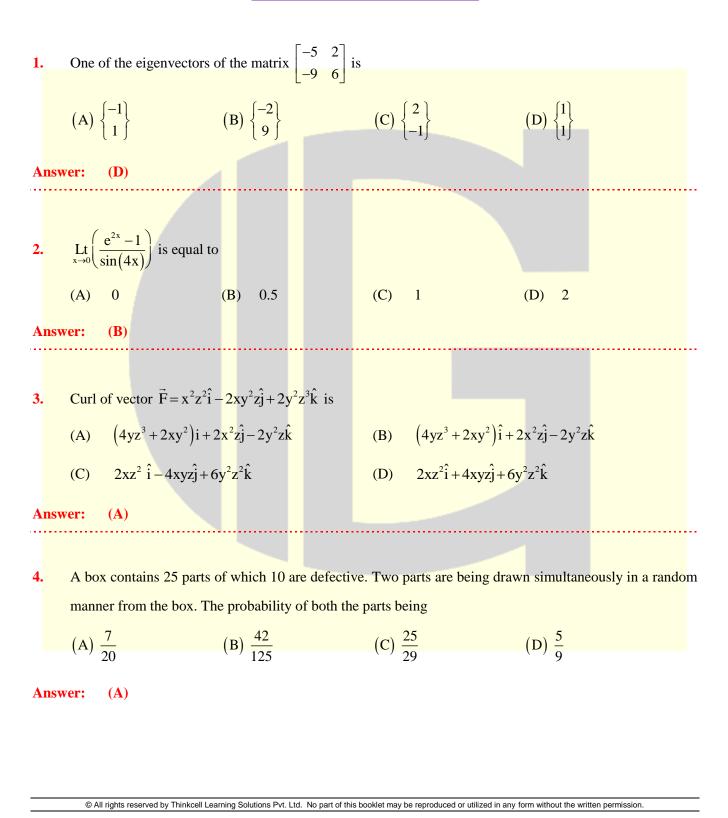

- (A) 4 times the draining rate (B) 3 times the draining rate
- (C) 2.5 times the draining rate (D) 2 times the draining rate
- Answer: (A)

G GATEFORUM Engineering Success

24. The relationship between true strain (ϵ_{T}) and engineering strain (ϵ_{E}) in a uniaxial tension test is given as

Answer: (C)

25. With respect to metal working, match Group A with Group B:

Group A	Group B			
(p) Defect in extrusion	I: Alligatoring			
(q) Defect in rolling	II: Scab			
(r) Product of skew rolling	III: Fish tail			
(s) Product of rolling through cluster mill	IV: Seamless tube			
	V: Thin sheet with tight tolerance			
	VI: Semi-finished balls of ball bearing			
(A) P-II, Q-III, R-VI, S-V	(B) P-III, Q-I, R-VI, S-V			
(C) P-III, Q-I, R-IV, S-VI	(D) P-I, Q-II, R-V, S-VI			

Answer: (B)

Q. No. 26 - 55 Carry Two Marks Each

.....

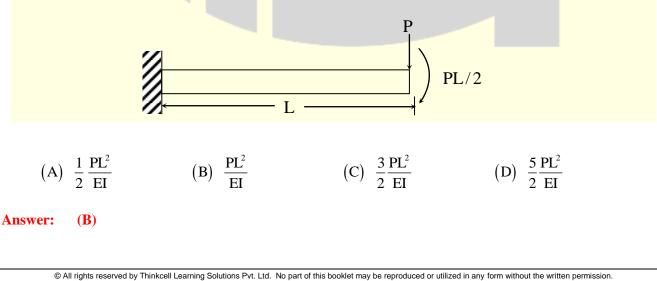

26. An analytic function of a complex variable z = x + i y is expressed as f(z) = u(x, y) + i v(x, y), where

 $i = \sqrt{-1}$. If u(x, y) = 2 x y, then v(x, y) must be

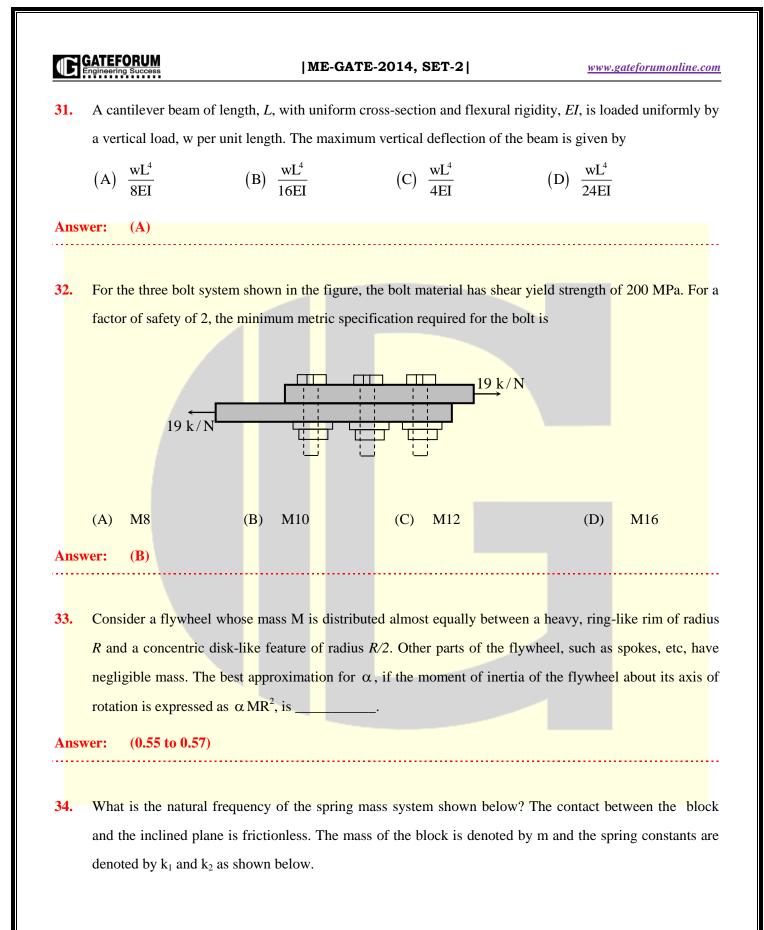

(A)	$x^2 + y^2 + constant$	(B)	$x^2 - y^2 + constant$
(C)	$-x^2 + y^2 + constant$	(D)	$-x^2 - y^2 + constant$

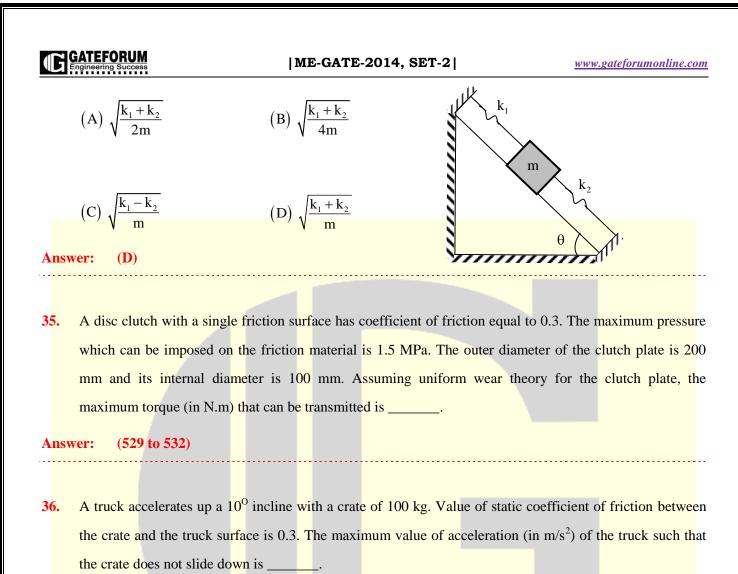

Answer: (C)

ATEFORUM |ME-GATE-2014, SET-2| www.gateforumonline.com The general solution of the differential equation $\frac{dy}{dx} = \cos(x + y)$, with c as a constant, is 27. (B) $\tan\left(\frac{x+y}{2}\right) = y+c$ (A) $y + \sin(x+y) = x + c$ (C) $\cos\left(\frac{x+y}{2}\right) = x + c$ (D) $\tan\left(\frac{x+y}{2}\right) = x + c$ Answer: **(D)** _____ 28. Consider an unbiased cubic dice with opposite faces coloured identically and each face coloured red, blue or green such that each colour appears only two times on the dice. If the dice is thrown thrice, the probability of obtaining red colour on top face of the dice at least twice is _____. Answer: (0.25 to 0.27)The value of $\int \ln(x) dx$ calculated using the Trapezoidal rule with five subintervals is _____. 29. (1.74 to 1.76) Answer: **30.** The flexural rigidity (EI) of a cantilever beam is assumed to be constant over the length of the beam shown in figure. If a load P and bending moment PL/2 are applied at the free end of the beam then the value of the slope at the free end is

13

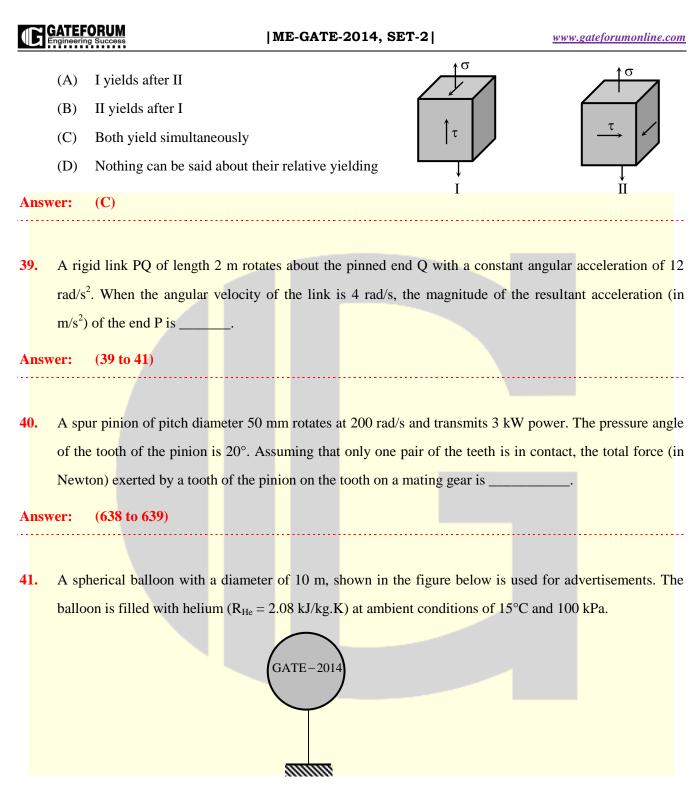

Answer: (1.0 to 1.3)

37. Maximum fluctuation of kinetic energy in an engine has been calculated to be 2600 J. Assuming that the engine runs at an average speed of 200 rpm, the polar mass moment of inertia (in kg.m²) of a flywheel to keep the speed fluctuation within $\pm 0.5\%$ of the average speed is _____

Answer: (590 to 595)

38. Consider the two states of stress as shown in configurations I and II in the figure below. From the standpoint of distortion energy (von-Mises) criterion, which one of the following statements is true?

Assuming no disturbances due to wind, the maximum allowable weight (in newton) of balloon material and rope required to avoid the fall of the balloon ($R_{air} = 0.289 \text{ kJ/kg.K}$) is _____.

Answer: (5300 to 5330)

G Engineering Success

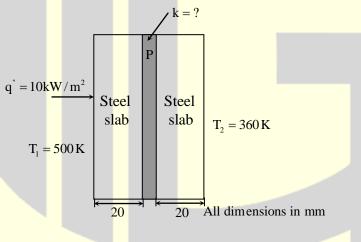

42. A hemispherical furnace of 1 m radius has the inner surface (emissivity, $\epsilon = 1$) of its roof maintained at 800 K, while its floor ($\epsilon = 0.5$) is kept at 600 K. Stefan-Boltzmann constant is $5.668 \times 10^{-8} \text{ W/m}^2$.K⁴. The net radiative heat transfer (in kW) from the roof to the floor is ______.

Answer: (24.0 to 25.2)

43. Water flows through a 10 mm diameter and 250 m long smooth pipe at an average velocity of 0.1 m/s. The density and the viscosity of water are 997 kg/m³ and 855×10⁻⁶ N.s/m², respectively. Assuming fully-developed flow, the pressure drop (in Pa) in the pipe is ______.

Answer: (6800 to 6900)

44. A material P of thickness 1 mm is sandwiched between two steel slabs, as shown in the figure below. A heat flux 10 kW/m² is supplied to one of the steel slabs as shown.

The boundary temperatures of the slabs are indicated in the figure. Assume thermal conductivity of this steel is 10 W/m.K. considering one-dimensional steady state heat conduction for the configuration, the thermal conductivity (k, in W/m.K) of material P is ______.

Answer: (0.09 to 0.11)

GATEFORUM Engineering Success

45. Consider laminar flow of water over a flat plate of length 1 m. If the boundary layer thickness at a distance of 0.25 m from the leading edge of the plate is 8 mm, the boundary layer thickness (in mm), at a distance of 0.75 m, is _____.

Answer: (13.5 to 14.2)

46. In an ideal Brayton cycle, atmospheric air (ratio of specific heats, $c_p/c_v = 1.4$, specific heat at constant pressure = 1.005 kJ/kg.K) at 1 bar and 300 K is compressed to 8 bar. The maximum temperature in the cycle is limited to 1280 K. If the heat is supplied at the rate of 80 MW, the mass flow rate (in kg/s) of air required in the cycle is ______.

Answer: (105 to 112)

47. Steam at a velocity of 10 m/s enters the impulse turbine stage with symmetrical blading having blade angle 30°. The enthalpy drop in the stage is 100 kJ. The nozzle angle is 20°. The maximum blade efficiency (in percent) is ______.

Answer: (85.1 to 89.9)

48. In a concentric counter flow heat exchanger, water flows through the inner tube at 25°C and leaves at 42°C. The engine oil enters at 100°C and flows in the annular flow passage. The exit temperature of the engine oil is 50°C. Mass flow rate of water and the engine oil are 1.5 kg/s and 1 kg/s, respectively. The specific heat of water and oil are 4178 J/kg.K and 2130 J/kg.K, respectively. The effectiveness of this heat exchanger is ______.

Answer: (0.65 to 0.67)

49. A heat pump with refrigerant R22 is used for space heating between temperature limits of -20°C and 25°C. The heat required is 200 MJ/h. Assume specific heat of vapour at the time of discharge as 0.98 kJ/kg.K. Other relevant properties are given below. The enthalpy (in kJ/kg) of the refrigerant at isentropic compressor discharge is ______.

www.gateforumonline.com

Saturation temperature	Pressure	Specific	enthalpy	Specific	entropy
$T_{sat}(^{\circ}C)$	P(MN/m ²)	h _f (kJ/kg)	hg(kJ/kg)	S _f (kJ/kg/K	S _g (kJ/kg.K)
-20	0.2448	177.21	397.53	0.9139	1.7841
25	1.048	230.07	413.02	1.1047	1.7183

Answer: (430 to 440)

50. A project has four activities P, Q, R and S as shown below.

Activity	Normal duration (days)	Predecessor	Cost slope (Rs./day)
Р	3	-	500
Q	7	Р	100
R	4	Р	400
S	5	R	200

The normal cost of the project is Rs. 10,000/- and the overhead cost is Rs. 200/- per day. If the project duration has to be crashed down to 9 days, the total cost (in Rupees) of the project is ______.

.....

Answer: (12490 to 12510)

51. Consider the following data with reference to elementary deterministic economic order quantity model

Annual demand of an item	100000
Unit price of the item (in Rs.)	10
Inventory carrying cost per unit per year (in Rs.)	1.5
Unit order cost (in Rs.)	30

The total number of economic orders per year to meet the annual demand is ______.

Answer: (49 to 51)

GATEFORUM Engineering Success

52. For the CNC part programming, match Group A with Group B:

	Group A			Group B
(p)	circular interpolation, counter clock	wise	I:	G02
(q)	dwell		II:	G03
(r)	circular interpolation, clock wise		III:	G04
(s)	point to point countering		IV:	G00
